

Distech Controls to Focus on Sustainability at Specifi UK

[Lyon, France, 8 February, 2024] - Distech Controls™, an innovation leader connecting people with intelligent building solutions, is pleased to announce that it will be taking part in the 2024 Specifi UK Mechanical Services Events. These professional specification events take place across the UK and revolve around insightful 'tech-talks' presented by manufacturers for end-users, specifiers and contractors.

"We are delighted to be attending this years' Specifi UK events," comments Simon Ward, Director of Sales – UK & Ireland for Distech Controls. "They are extremely well attended and are the perfect setting for us to meet with specifiers. We will be emphasising the significance of sustainability in buildings to all visitors at our table, shedding light on our expertise in how controls can unlock greater efficiencies and elevate comfort for occupants. Our aim as a company is to make buildings more sustainable, human-centric and autonomous, we have exciting solutions to share, and I am looking forward to meeting everyone at the events."

Distech Controls will be attending all of the Mechanical Services Events:

- Manchester (16th January)
- Bristol (6th February)
- Birmingham (27th February)
- London (9th April)
- Glasgow (10th June)
- Belfast (2nd July)
- Dublin (4th July)
- Cardiff (8th July)
- Edinburgh (5th September)
- Leeds (15th October)
- London (4th December)

Distech Controls on display

During the event the Distech Controls team will be on hand to talk through the company's newest innovations including the new Resense Move. Resense Move is an advanced multi-function sensor that optimises every m² of space by monitoring occupancy levels to deliver operational and energy efficiencies. The seven-in-one sensor proactively provides air at the right place, at the right time for better indoor air quality whilst measuring and controlling VOC, temperature, light and sound.

Visitors will also be able to learn more about ECLYPSE Building Intelligence, a microservices-based software platform which facilitates the design, deployment, operation and maintenance of buildings with unprecedented

efficiency. The vision for ECLYPSE Building Intelligence is to make buildings more sustainable, autonomous and human-centric, whilst ensuring it is easy and simple to deploy and also leveraging the power of a data model.

Distech Controls supports customers with solutions from Field Devices through to delivering Data-Driven Insights across a building portfolio. Connecting the bridge between devices and data is the ECLYPSE APEX, a powerful HVAC / IoT Edge controller which collects data and shares it with the Building Intelligence software.
